Re: Lower Willamette River, Portland Harbor Superfund Site

USEPA Docket No: CERCLA-10-2001-0240 Monthly Progress Report for January 2010

Dear Mssrs. Humphrey and Blischke:

This monthly status report provides information required by the Portland Harbor Superfund Site Administrative Settlement and Administrative Order on Consent (ASOC).

1. ACTIONS TAKEN IN JANUARY 2010

Additional supporting information for the benthic risk evaluation was provided to EPA on January 19, 2010. A technical meeting on the benthic reanalysis was held on January 22, 2010. The LWG's response to EPA's preliminary directive comments on the Baseline Human Health Risk Assessment and Baseline Ecological Risk Assessment were provided to EPA on January 20, 2010. A memorandum on the LWG's proposed approach to modeling total PCBs was provided to EPA on January 20, 2010. The Baseline Human Health Risk Assessment Section 5 risk characterization tables in Excel format were provided to EPA on January 22, 2010.

No field activities were performed during January.

Deliverables Approved by EPA

None.

Deliverables Submitted to EPA

None.

Comments/Documents provided by EPA

• January 6, 2010: Preliminary Identification of ARARs at the Portland Harbor Site for Development of the Feasibility Study

2. PROBLEMS ENCOUNTERED, ANTICIPATED DELAYS, AND SOLUTIONS

The timing of the fate and transport modeling calibration check-in is dependent upon EPA's decision whether or not to model total PCBs and when EPA responds to the LWG's January 20, 2010 total PCB modeling approach memorandum.

The alternatives development and screening check-in will be held in May 2010, given the one month delay in fate and transport model calibration, which was reported to EPA in January. If EPA requests that the LWG model total PCBs, the check-in will be held in July 2010.

The timeline for the revised Stormwater Loading Calculation Methods report has been pushed back to allow time for the inclusion of the loads for DDE, which EPA requested be added to the modeling list. In addition, this deadline may be further impacted if EPA decides total PCBs should be added to the modeling list. The timing of this report does not impact the overall FS schedule.

3. RESULTS OF SAMPLING, TESTS, AND OTHER DATA RECEIVED

None. All sampling and analysis tasks are completed.

4. SCHEDULE FOR THE NEXT FOUR MONTHS

Work covered by the ASOC that is potentially planned for February, March, April, and May 2010 includes the following:

- February 2, 2010: Risk Management Framework Check-in
- March 2010: Revised Stormwater Loading Calculation Methods
- May 2010: Alternatives Development and Screening Check-in

Submittal dates for pending products currently under preparation by LWG and scheduled for submittal in upcoming months are listed in Table 1 – Status of Active LWG Deliverables – Portland Harbor RI/FS. This table has been reformatted from previously submitted versions to only include pending and recently submitted deliverables for which EPA comments or approvals are required. Table 2 – Status of LWG Deliverables – Portland Harbor RI/FS reflects the more complete list of LWG submittals and is equivalent to the former Table 1 provided in previous progress reports.

5. DOCUMENTS AND ISSUES AWAITING EPA RESPONSE

EPA comments or approvals have not been received on a number of documents that have been submitted to EPA as required by the ASOC; these submittals are listed in Tables 1 and 2. The LWG requests EPA provide document approvals for these submittals to verify that the terms of the ASOC are being met and issues are resolved to maintain progress on the RI/FS. Also, the LWG believes that many of the documents listed as future submittals in Table 2 are no longer needed (see Status/Comments column) and requests that EPA review the list and confirm that these documents are indeed not needed.

If you have any questions, please give me a call at (503) 670-1108.

Sincerely,

Jennifer Woronets

LWG Administrative Project Coordinator
